

ICMV is the annual conference gathering scholars from all over the world to discuss and share experiences and research results about all aspects of Machine Vision. This conference fosters interaction among researchers and practitioners, and provides an ideal environment to develop new collaborations.

The 9th International Conference on Machine Vision, ICMV 2016, held in Nice, 18-20 November 2016, which has established itself as a high quality forum for researchers, experts and practitioners from machine vision, pattern recognition, machine learning, image analysis, and related fields.

It gives us great pleasure to announce that the 10th International conference on Machine Vision, ICMV 2017, will be held in Vienna, Austria, 13-15 November 2017. Vienna, the “City of Music” and the “City of Dreams”, is rich in architectural ensembles, monuments and parks. For a number of years Vienna has been world’s number-one destination for various international congresses. It receives more than 6 million tourists every year, can be reached easily from any point of the globe, and can offer all facilities necessary for a successful conference.

Lectures from leading experts in the field as well as invited papers from all around the globe will present state-of-the-art in major fields of Machine Vision and also in various fields of Image Analysis, Pattern Recognition and Machine learning as detailed in the conference topics. The highly selective peer-review process will guarantee the quality of accepted papers that will be published by SPIE.

On behalf of the conference committee, I have the pleasure to cordially invite you to this premier interdisciplinary forum for researchers, practitioners and educators to discuss your latest research findings, encountered challenges and future perspectives with the research community by submitting a paper to this conference.

Looking forward to welcoming you in Vienna, ICMV 2017, in November 2017.
